

Parents,

Some of you have given me feedback that the animated math models are not very user friendly because the models are listed as skill numbers rather than lesson numbers. I have put together a table indicating which skill number(s) goes with each of the lessons. Please note that not all lessons have an animated math model. In the absence of an animated math model, you may try the gomath academy resource. I am also trying to come up with other solutions to help you assist your child with the math homework.

Thanks for your patience and understanding,
Mrs. Townsend
